

IN THE CLAIMS

Claim 1 (Currently Amended): An apparatus comprising:

a ~~plurality of~~first and a second light fixture coupling brackets each adapted to removably couple to a frame of a light box, each of the plurality of the first and the second light fixture coupling brackets each including a first and a second through-hole and coupled to the frame by to a light bar coupling device inserted into the first through-hole of the first and the second light fixture coupling brackets,

a first and a second tightening handle each coupled to a light fixture coupling bracket through the second through-hole of the first and the second light fixture coupling brackets,

wherein said ~~plurality of light fixture coupling brackets~~light bar coupling device including an attaching pin adaptable to couple to a light bar having at least one light socket adapted to accept the attaching pin within the at least one socket within said light box, said ~~plurality of~~ light fixture coupling brackets adaptable to couple to a removably and adjustable gripping device including a gripping pin, said gripping device is rotatably adjusted around said light box, said gripping device coupled with the first and the second tightening handles and the ~~plurality of~~first and the second light fixture coupling brackets.

Claim 2 (Canceled)

Claim 3 (Currently Amended): The apparatus of ~~claim 2~~claim 1, said adjustable gripping device further including:

a gripping pin coupled to a rear portion of said gripping device, the first and a second tightening handle opposing one another, wherein said first and said second tightening handle adjusts an angle of said adjustable gripping device in relation to ~~said plurality of~~of the first and the second light fixture coupling brackets and the light box, said gripping pin is substantially centered on said rear portion.

Claim 4 (Currently Amended): The apparatus of ~~claim 2~~claim 1, ~~said plurality of the first and the second~~ light fixture coupling brackets each adaptable to couple to a light bar bracket having at least one light set attaching pin, wherein said at least one light attaching pin couples to a removable light set.

Claim 5 (Currently Amended): An apparatus comprising:  
a light bar having at least one ~~light socket~~ adapted to attach to an attaching pin,  
the attaching pin to couple to the at least one socket through insertion into the at least one socket, said light bar including at least one removable gripping device, said gripping device including a gripping pin substantially centered on a rear portion of said light bar, said gripping pin removable from said gripping device, said gripping device removably coupled to a plurality of light fixture coupling brackets ~~and through a first and a second tightening handles~~ handle, wherein said removable gripping device removably coupled to a light box having a plurality of expansion rods coupled to a first and a second frame, and each of a plurality of light fixture coupling devices removably coupled ~~to through~~ the light bar and through the plurality of light fixture coupling brackets.

Claim 6 (Previously Presented): The apparatus of claim 5, wherein said light bar includes at least one light set attaching pin, wherein said at least one light set attaching pin couples to a removable light set bracket.
